## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 26 and 27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 26 contains the phrase "the maximum ceramic material processing temperature". There is insufficient antecedent basis for this limitation.

Claim 27 contains the phrase "the sintering step". There is insufficient antecedent basis for this limitation.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1, 4, 5, 7, 10, 12, and 21-32 are rejected under 35 U.S.C. 102(a) as being anticipated by Seals et al (US 6,071,628). Please refer to the office action mailed May 7, 2003 for the text of the rejection. Regarding newly submitted claim 23, the hollow particles of Seals are considered voids. Regarding claims 25-27, and 32, process limitations are not considered to structurally define over the prior art. Regarding claim 29, the thermal expansion of silica is approximately twice that of zirconia. Regarding claim 30, silica is ceramic. Should claim 29 have "the" before "twice" in line 2?

*Allowable Subject Matter*

Claims 6 and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

*Response to Arguments*

Applicant's arguments filed May 5, 2004 regarding the rejection over Seals '628 have been fully considered but they are not persuasive. Applicant amended the independent claims to reflect that the inclusions have a coefficient of thermal expansion greater than that of the ceramic material. Seals teaches a thermal barrier comprising hollow ceramic particles in a matrix. The matrix is preferably YSZ and the hollow particles may include silica. Silica has a higher thermal expansion than zirconia (approximately 22 and 9, respectively). The article of Seals is still considered to meet the limitations of the claims as rejected above.

*Conclusion*

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
